t.me/tem_kg +996 220 518 825

01 Profile

Frontend developer with 5+ years of experience across FinTech, SaaS, and MedTech. Builds production features with React, Vue, and Angular, from MVPs to legacy modernization. Works in teams of 2 to 10, with a focus on interface design, performance, developer experience, and mentoring.

02 Experience

TradingView

NOV 2025 TO PRESENT

- Building the Order Panel and Account Manager for Supercharts.
- Led native implementation of the mobile Broker Selection screen with several mobile teams. User satisfaction improved by approximately 10%.
- Led order preset storage migration, preserving existing presets, improving loading speed by approximately 100%, and reducing storage usage by approximately 5%.
- Led redesigns of order information and crypto order tickets through repeated user feedback and iteration.
- Contributed to internal Planning Poker and Diff Viewer tools, conducted technical interviews, and introduced custom skills and practices for AI adoption.

Saritasa

JAN 2022 TO NOV 2025

Shared tools & mentorship COMPANY-WIDE

- Built a shared repository of React and Vue components and Figma assets. Average feature development time fell by approximately 20% across 10+ client projects.
- Mentored and onboarded 10+ junior developers and interns with individual development plans.

Urban infrastructure platform REACT

- Built a unified design system from scratch to support a large-scale application rewrite.
- Improved critical data-table performance by 40%, from 7 seconds to under 5 seconds, using virtualization and memoized selectors.
- Built an interactive map with @vis.gl/react-google-maps, custom filters, and shareable public links.

SELECTED PROJECTS & CAPABILITIES

ARTEM SOTNICHENKO / FRONTEND DEVELOPER

03 Saritasa / continued

Healthcare legacy modernization VUE

- Led migration of a six-year-old jQuery, Vue 2, and Vuex monolith to micro-frontends using Vue 3, TypeScript, and Pinia.
- Introduced TypeScript, GitHub Actions build pipelines, and ESLint to improve codebase stability.
- Wrote documentation and an onboarding plan that reduced developer onboarding from 5 days to 2.

ERP / CRM applications REACT / VUE

- Cut initial page load time by over 50% and bundle size by 66%, from approximately 1.5 MB to 500 KB, through code splitting and asset optimization. Improved LCP by 50%, FCP by 12%, and CLS by 100%.
- Worked with backend engineers on API code generation, reducing feature development time by 5% to 20%.

Sibdev

SEP 2020 TO JAN 2021

- Resolved discrepancies between Figma designs and the production app and documented UI guidelines.
- Refactored and shipped 5+ shared UI components used across multiple teams.
- Implemented multilingual support with vue-i18n.

04 Technical skills

LANGUAGES
TypeScript, JavaScript ES6+, Node.js, Go

FRAMEWORKS / LIBRARIES
React, Redux, Zustand, Vue, Pinia, Angular, RxJS

UI / STYLING
MUI, Shadcn, Vuetify, Tailwind CSS, SCSS, CSS Modules, Framer Motion

TESTING / TOOLING
Jest, Vitest, Playwright, Webpack, Vite, Docker, GitHub Actions

05 Education

Siberian Federal University
Bachelor of Arts
Computer Software Engineering
SEP 2018 TO JUL 2022
